March 20, 1985

Dear Sirs,

Since 1980 we are using Glassflake No 202 to Protect our Shoretanks against Phosphoric-Acid with 54 % P205.

During our regular inspections of the inside from 3 Tanks in 1981 and 1983 we found no damages in the coating.

For this reason we can tell you that we are very glad about our decision in 1979 to take Glassflake 202.

Yours faithfully

DUPEG Tank-Terminal

ppa.

Ortmann
